

Disaster Mastermind

Business Continuity and Risk Management

A Business Continuity Plan will help your business return to normal more quickly following emergencies and reduce the longer term impacts from loss of production and service delivery.

Continuity Planning does not have to be complex and complicated. In essence its quite simple.

Your Plan is about identifying potential risks, likely impacts and losses, the types of service disruptions that would prevent you from continuing to operate, and the strategies you can use to have your business up and running in a timely manner.

Disaster Mastermind has broad experience in Business Continuity Planning. Our expert consultants will work with your business to develop a plan that meets your needs and provides practical steps for risk reduction and ensuring business continuity following a disaster. Our services will help you:

- Understand and manage your risks and hazards.
- Identify your critical functions and minimum requirements for business continuity.
- Identify key personnel and external providers necessary to ensure you can continue to conduct your core business and meet service delivery.
- Identify opportunities and improvement processes that can be initiated now to minimise business risks and impacts.
- Develop alternative options for personnel, resources and equipment, suppliers and critical services that can be readily activated when your existing structures are unable to continue to operate.
