

# Disaster Mastermind

## Planning for Emergency Events

We all have a shared responsibility to plan for emergencies across all tiers of the Emergency Management Spectrum – Prevention, Preparation, Response and Recovery.

At Disaster Mastermind we offer extensive experience in strategic and operational planning for emergencies and recovering from large scale disaster events.

Our aim is to build resilience and capability across all sectors involved in emergency management including:

- Emergency Services and Functional Areas.
- State and Local Governments.
- Industry Groups and Primary Producers.
- Business entities.
- Community based organisations.

### Strategic Planning

- Emergency Management.
- Risk identification and analysis.
- Mitigation and preparedness activities.
- Industry and primary production emergency readiness.
- Business Continuity.
- Recovery.

### Emergency Operations

- Supporting agencies and incident management teams during response and recovery operations.
- Expertise in multihazard/ multiagency emergencies.
- Post event de-briefs and lessons learned.

### Resilience and Capability

- Training and e-learning development and delivery.
- Community engagement and consultation.
- Grant and funding submissions.
- Building partnerships and networks.
- Workgroup facilitation.
